

The Company

Founded in 1938 by Vic Edelbrock Sr., Torrance, Calif.-based Edelbrock Corp. (NASDAQ NM: EDEL) is celebrating its 66th anniversary of manufacturing and marketing the highest quality aftermarket performance automotive and motorcycle products.

Edelbrock's ever-expanding product line now features more than 8,100 performance products for domestics and imports, including nitrous systems, fuel rails, throttle bodies, exhaust headers, camshafts, fuel pumps, aluminum manifolds, turbos, exhaust systems, suspension and shocks, EFI systems, aluminum cylinder heads, water pumps, crate engines, brake and fuel lines and fluid transfer products. Edelbrock also manufactures aftermarket parts for Harley-Davidson and other motorcycles, plus ATVs.

The Objective

A long time customer of Alamo - Edelbrock implemented QS-9000 in 1998 and is in the process of upgrading their existing quality system to TS-16949.

The Action Plan

The Fast Track - Alamo saved Edelbrock time and helped offset the workload by mapping-out the upgrade process, handling everything 100% correct without any guesswork, and assigning personnel who were qualified for the required tasks.

The Benefits

Alamo's Fast Track was beneficial in the short term by providing invaluable implementation assistance, and in the long run for Edelbrock's existing and future business opportunities.

The People

Alamo's personnel are friendly, attentive, knowledgeable, professional, and communicate at appropriate levels of understanding.
